FOREWORD

These Texas County Statistics present 1979 agricultural statistics for each county on a single page. The statistics have been made possible by the Texas Legislature which provided the Texas Department of Agriculture with funds for the operation of an annual county data program. The project is in cooperation with the Economics and Statistics Service of the U.S. Department of Agriculture.

Individual sheets showing all of the data for a given county are available separately. Also available upon request are commodity bulletins showing all Texas counties for Vegetables, Fruit and Pecans, Small Grains, Field Crops, Cotton, Livestock, Poultry, Dairy, and Cash Receipts.

Many individuals and organizations support and make possible these county statistics, but I want to especially thank the farmers and ranchers who have furnished basic data for their operations. At the same time, I would like to congratulate them for their efforts in producing food and fiber in Texas; these statistics attest to the fact that during 1979 Texas moved into second place in the nation in agriculture with nearly $10 billion received for farm commodities during the year.

Sincerely,

Reagan V Brown

Reagan V. Brown
Texas Commissioner of Agriculture
